Global Learning programme

Be part of the Global Learning Programme

Helping your school inspire pupils by deepening their understanding of global issues

What is the Global Learning Programme?

The **Global Learning Programme** (GLP) is a ground-breaking new programme which helps schools to deliver effective teaching and learning about development and global issues at Key Stages 2 and 3.

What is global learning?

Global Learning is an approach to learning about international development through recognising the importance of linking people's lives throughout the world. It encourages critical examination of global issues and an awareness of the impact that individuals can have on them.

Why take part?

Schools participating in the Global Learning Programme (GLP) will experience the exciting impact that knowledge and understanding of global learning can bring to pupils' learning across the curriculum. The GLP will also help schools develop an ethos promoting tolerance, fairness and respect.

What does the GLP offer your school?

The programme provides schools with the support needed to help pupils learn about the challenges our world faces and to think critically about how to deal with issues such as poverty, inequality and sustainability.

This support includes:

- free peer-led training events provided by GLP Local Advisors and Expert Centres
- e-credits to pay for teacher professional development
- online Whole School Audit and Action Plan tools to help identify strategies for developing global learning
- curriculum guidance in key subject areas mapped to the new National Curriculum
- an on-line tool to assess pupils' global learning
- easily-accessible and GLP-approved resources
- action research opportunities through the GLP Innovation Fund
- opportunities for schools to become GLP Expert Centres.
